1. Introduction

1.1 Purpose of the Document

The purpose of this Business Requirements Document (BRD) is to define the business needs, objectives, requirements, constraints, and expectations for the development of the Expense Tracker Mobile App. This document serves as a reference for stakeholders, the development team, and project management throughout the project lifecycle.

1.2 Scope of the Project

The project involves designing and developing a mobile application that enables users to record daily expenses, categorize spending, create monthly budgets, monitor financial activities, and generate expense reports.

In Scope

- User registration and login
- Expense recording
- Expense categorization
- Expense editing and deletion
- Monthly budget creation
- Budget notifications
- Expense search and filtering
- Monthly reports and spending analytics

Out of Scope

- Investment tracking

- Tax calculation
- Stock market analysis
- Cryptocurrency portfolio management
- Banking integration

1.3 Document Overview

This document outlines the business objectives, existing business challenges, proposed solution, stakeholder responsibilities, business requirements, assumptions, risks, dependencies, and project approval process for the Expense Tracker Mobile App.

2. Business Objectives

2.1 Business Goals

- Improve personal expense management.
- Encourage responsible spending habits.
- Help users create and follow monthly budgets.
- Increase financial awareness through expense analysis.
- Simplify daily expense tracking using a mobile application.

2.2 Project Objectives

- Develop a centralized mobile application for expense management.
- Allow users to record expenses quickly and accurately.
- Provide categorized expense tracking.
- Generate monthly expense summaries and reports.
- Notify users when they approach their monthly budget.
- Deliver an intuitive and user-friendly experience.

2.3 Success Criteria

- At least 80% of active users record one expense daily.
- User retention exceeds 60% after one month.
- Expense entry success rate reaches at least 90%.
- At least 70% of users create a monthly budget.
- Customer Satisfaction (CSAT) score exceeds 4.0/5.
- Average session duration exceeds 3 minutes.

3. Current Business Environment

3.1 Current Processes

Most users manually manage their expenses using notebooks, spreadsheets, or simple note-taking applications. Budget calculations are performed manually, making it difficult to monitor spending patterns or identify unnecessary expenses.

3.2 Challenges and Issues

- Users forget to record daily expenses.
- Limited visibility into monthly spending.
- Difficulty identifying spending trends.
- Overspending due to lack of budget monitoring.
- Manual calculations consume time.
- Lack of financial insights for informed decision-making.

4. Proposed Solution

4.1 Description of the Solution

The proposed Expense Tracker Mobile App is a centralized personal finance application that enables users to securely record, organize, categorize, and analyze their daily expenses. The application provides budgeting tools, spending reports, analytics dashboards, and budget notifications to help users make informed financial decisions.

4.2 Business Requirements

BR-01: Users shall be able to register and securely access the application.

BR-02: Users shall be able to record daily expenses.

BR-03: Users shall be able to categorize expenses.

BR-04: Users shall be able to edit and delete expense records.

BR-05: Users shall be able to create and monitor monthly budgets.

BR-06: The application shall notify users when spending approaches predefined budget limits.

BR-07: Users shall be able to view monthly expense summaries and reports.

BR-08: Users shall be able to search and filter recorded expenses.

BR-09: The organization shall maintain secure storage of user financial records.

BR-10: The application shall improve users' financial awareness through spending insights and analytics.

4.3 Functional Requirements

FR-01: User registration and authentication.

FR-02: User login functionality.

FR-03: Add new expense entries.

FR-04: Edit existing expenses.

FR-05: Delete expense records.

FR-06: Assign categories to expenses.

FR-07: Create and update monthly budgets.

FR-08: Generate budget threshold notifications.

FR-09: Display monthly expense reports and analytics.

FR-10: Search and filter expenses.

FR-11: Store expense records securely in the database.

4.4 Non-Functional Requirements

NFR-01: Application response time shall be less than three seconds.

NFR-02: System availability shall be at least 99%.

NFR-03: User financial data shall be encrypted.

NFR-04: Secure authentication shall be implemented.

NFR-05: The application shall provide a mobile-friendly and intuitive user interface.

NFR-06: Regular database backups shall be maintained.

5. Stakeholders

5.1 List of Stakeholders

Stakeholder	Interest in Project
End Users	Track expenses and manage budgets
Product Manager	Define product vision and business requirements
Development Team	Develop and maintain the application
UI/UX Designer	Design intuitive user interfaces
QA Team	Ensure application quality
Project Sponsor	Approve funding and project direction

5.2 Roles and Responsibilities

Stakeholder	Responsibility
End Users	Record expenses and provide feedback
Product Manager	Define requirements and prioritize features
Development Team	Design, develop, and maintain the application
UI/UX Designer	Create user-friendly interfaces
QA Team	Test functionality and quality
Project Sponsor	Approve budget and project milestones

6. Constraints

6.1 Budgetary Constraints

The project budget is limited to **₹12,00,000**.

6.2 Timeline Constraints

The project must be completed within **six weeks** from project initiation.

6.3 Technical Constraints

- The application must support Android devices for the MVP release.
- Secure user authentication must be implemented.
- Mobile performance should remain responsive under normal usage.
- Cloud infrastructure must support secure data storage.

7. Assumptions

- Users own compatible smartphones.
- Internet connectivity is available during synchronization.
- Users will provide accurate expense information.
- Push notification services will be available.
- Cloud database infrastructure will be operational.
- Users will update the application when new versions are released.

8. Risks

8.1 List of Risks

Risk	Impact
Delayed requirements gathering	Project schedule delays
User resistance to adopting the app	Low user engagement
Security vulnerabilities	Data privacy concerns
Budget overruns	Scope reduction
Performance issues	Poor user experience
Delayed development	Release postponement

8.2 Risk Mitigation Strategies

Risk	Mitigation Strategy
Delayed requirements	Conduct stakeholder workshops early
User adoption issues	Perform usability testing and onboarding
Security vulnerabilities	Implement encryption and security testing
Budget overruns	Monitor project costs regularly
Performance issues	Optimize application performance and conduct load testing
Development delays	Follow Agile sprint planning and regular progress reviews

9. Dependencies

9.1 List of Dependencies

- Mobile development framework availability.
- Cloud database infrastructure.
- Notification service integration.
- UI/UX design completion.
- Stakeholder approvals.
- Availability of testing resources.
- Mobile application deployment platform.

10. Approval

10.1 Sign-off

Name	Department	Signature	Date
Product Manager	Product Management		
Engineering Lead	Engineering		
Project Sponsor	Senior Management		

Conclusion

The Expense Tracker Mobile App will provide users with a centralized and efficient solution for managing their daily expenses and monthly budgets. By replacing manual expense tracking methods with an intuitive mobile application, the project aims to improve financial awareness, encourage responsible spending habits, and deliver meaningful insights through reports and analytics. The successful implementation of this solution is expected to enhance user satisfaction while promoting better personal financial management.
